

IFAD TS A/S participating in the upcoming NATO CAS Conference in Poland, DEC 10th – 12th.

The conference on Air-Land integration enhancement in NATO – ALIEN (also known as the NATO CAS Conference 2024) is taking place at the Polish Air Force University based in Deblin. The conference will take place from the 10th DEC until 12th DEC.

As a developer and provider of JTAC training systems to defense forces both domestically and abroad, IFAD is looking forward to participate in this conference and showcasing our simulation based JTAC training system IFACTS2.

- The IFACTS2 JTAC training system has been delivered to several nations.
- IFACTS2 is supporting these nations' JTAC operators during their education to become qualified JTACs based on the NATO standards and SOPs.
- Also, IFACTS2 is used for maintaining their status as qualified JTACs.
- IFACTS2 has achieved a NATO as well as US accreditation for all types of control.

IFAD will be collaboration with Precision Technic Defense in respect to showcasing and demonstrating the IFACTS2 and we will be found at the PTD stand/booth at the conference. Here we will demonstrate the capabilities of the system and the options for training JTACs in every imaginable scenario possible including the newly developed feature of using VR-goggles during training.

If you attend the conference, please feel free to stop by the PTD stand/booth and have a talk on the future of JTAC training, try it for yourself and see the system live.

Contact Mr. Henrik Fabricius, Director Sales & Marketing at IFAD for further information on the IFACTS2 JTAC training solution.
